

WHY SUNDANCE?

Regional Distribution

Unlike other manufacturers, Sundance uses local distributors. Here at Asheville Retractable, **we only distribute louvered roof systems for North & South Carolina.** That way we can focus on you as a dealer. We'll provide the training and customer service you need to be successful and keep your customers happy.

The Strongest Louvers

We have the strongest louvers on the market. In some areas of the US, our louvers will span 16ft. That's 25% more than the competition. Because of the unmatched quality of our product, it can be rated for high snow loads and a wind load of up to 180 mph.

Tongue and Groove Ceiling

Your customers will love the "tongue and groove look" in contrast to the corrugated industry standard.

ADDITIONAL FEATURES

10 Year Warranty

We as the local distributor back our product with a 10 year warranty on structure and a 5 year warranty on electronics.

Bigger, Better Gutters

Larger gutters mean better water control; and they're compatible with leaf screens. And, where other manufacturers use square boxy gutter systems, Sundance roofs are equipped with an ascetically pleasing crown moulding style design.

Hearing Is Believing

Using a combination of stainless steel ball bearings and bumper seal gaskets on each and every louver, Sundance louvered roof systems are engineered to be as silent as possible.
